

ASX ANNOUNCEMENT

8th July, 2014

ViMove approved for sale in New Zealand

Melbourne, Australia: Medical device company dorsaVi Limited (ASX: DVL) has today announced regulatory approval for the use and sale of ViMove from Medsafe, the New Zealand Medicines and Medical Devices Safety Authority.

ViMove is dorsaVi's product for healthcare professional use and is currently available at medical, physiotherapy and osteopathy clinics in Australia, Canada and Europe.

ViMove consists of wearable sensors that are placed on the body to measure movement and muscle activity. Patients can be assessed through a series of movements or exercises performed in-clinic, or outside the clinic, at home or at work, where ViMove can monitor their everyday activities, and provide immediate biofeedback to the patient and a concise report for the healthcare practitioner.

The revolutionary device allows healthcare professionals that manage back pain or musculoskeletal conditions to offer personalised treatment to many patients.

dorsaVi CEO Andrew Ronchi said, "New Zealand adds to our rapidly expanding number of jurisdictions where ViMove is now available. We are pleased that patients in Auckland can already access our revolutionary wearable sensor technology at Kompass Health Associates and look forward to seeing further expansion in the rest of the country." said Mr Ronchi.

About dorsaVi

dorsaVi (ASX:DVL) is an ASX company focused on developing innovative motion analysis device technologies for use in elite sports, occupational health and safety, and clinical applications. dorsaVi believes its wearable sensor technology enables – for the first time – many aspects of detailed human movement and position to be accurately captured, quantified and assessed outside a biomechanics lab, in both real-time and real situations for up to 24 hours.

Our technology has applications across three sectors:

- **Clinical:** ViMove is transforming the management of patients who are suffering from back pain and musculoskeletal conditions by providing objective assessment, monitoring outside

For personal use only

the clinic and immediate biofeedback. ViMove is currently used by medical and physiotherapy practises in Australia and the United Kingdom.

- **Elite Sports:** ViPerform is allowing coaches and medical teams managing elite athletes and teams to screen and assess risk of soft tissue injury, take preventative action, optimise technique as well as effectively rehabilitate athletes prior to return to sport. ViPerform is being used by AFL and NRL clubs in Australia, clubs in the Barclays Premier League, Australian and Victorian Institutes of Sport, various Olympic teams and athletes internationally, and Cricket Australia.
- **OH&S:** ViSafe is enabling employers to assess risk of injury for employees as well as effectiveness of proposed changes to workplace design, equipment or methods) based on objective evidence. ViSafe has been used by major corporations including Coles, Woolworths, Toll, Toyota, Orora (formerly Amcor), Crown and BHP Billiton.
