

ASX ANNOUNCEMENT

2 June 2015

dorsaVi signs UK physiotherapy network

Melbourne, Australia and London, UK – Medical device company dorsaVi Ltd (ASX: DVL) has today announced the signing of Your Physio Plan, a major United Kingdom clinical physiotherapy healthcare plan.

Your Physio Plan is a national network of 83 Member Clinics with a unique business model allowing members to pay a monthly payment of professional fees to a health and wellbeing care plan in order to receive regular and high quality physiotherapy services. Your Physio Plan's aim is to expand to more than 300 clinics over the next year.

An initial 10 ViMove devices have been licensed to Your Physio Plan and will be deployed in five of its flagship clinics. The Your Physio Plan team will work closely with dorsaVi over the next three months to integrate and establish ViMove as the standard of care (SOC) for assessing and managing back pain within those clinics. Based on the results of this initial program, the intention is to expand the roll out of ViMove across the national UK network of Your Physio Plan clinics. Some of the clinics will also pilot integrating ViMove into the services currently offered to National Health Service (NHS) patients.

Zoe Whyatt, dorsaVi Europe Chief Operating Office said: "Your Physio Plan has revolutionised and improved the way people access physiotherapy and physical conditioning in the United Kingdom. This initial program will focus on using ViMove in the management of patients suffering from non-specific low back pain which is the most common form of back pain."

Denise Kesson, Co-founder and Director, Your Physio Plan commented: "dorsaVi's ViMove brings to the physiotherapy profession something really exciting. It gives the physiotherapist and the patient comprehensive data. ViMove reports allow the patient to visualise their progress and provide objective data on the benefits of physiotherapy for low back pain."

"Your Physio Plan and dorsaVi's partnership is a game changer for the physiotherapy industry. Simply put, it allows everyone to have gold standard treatment at an affordable price and at a clinic near them."

About ViMove

ViMove consists of wearable sensors that are placed on the body to measure movement and muscle activity. Patients can be assessed through a series of movements or exercises performed in-clinic, or outside the clinic, at home or at work, where ViMove can monitor their everyday activities, and provide immediate biofeedback to the patient and a concise report for the healthcare practitioner.

About dorsaVi

dorsaVi Ltd (ASX: DVL) is an ASX company focused on developing innovative motion analysis device technologies for use in clinical practice, elite sports, and occupational health and safety. dorsaVi believes its wearable sensor technology enables – for the first time – many aspects of detailed human movement and position to be accurately captured, quantified and analysed outside a biomechanics lab, in both real-time and real situations for up to 24 hours.

Our technology has application across three sectors:

- **Clinical:** ViMove is transforming the management of patients by providing objective assessment, monitoring outside the clinic and immediate biofeedback. ViMove is currently used by medical and physiotherapy practices in Australia and the United Kingdom and is now available in the United States following FDA 510(k) clearance.
- **Elite Sports:** Elite sports medical teams are using ViPerform to screen and assess risk of injury, take preventative action, optimise technique, improve athlete rehabilitation, and make better return to competition decisions. ViPerform is being used by AFL and NRL clubs in Australia, clubs in the Barclays Premier League, Australian and Victorian Institutes of Sport, Cricket Australia and various Olympic teams and athletes internationally.
- **OHS:** We combine innovation, measurement and quality to reduce workplace incidents, costs, meet compliance and improve brand reputation. ViSafe enables employers to assess risk of injury for employees as well as test the effectiveness of proposed changes to workplace design, equipment or methods based on objective evidence. ViSafe has been used by major corporations including Coles, Woolworths, Toll, Toyota, Orora (formerly Amcor), Crown and BHP Billiton. Australian Workplace Compliance (AWC) delivers risk mitigation through compliance to OHS, Quality Management Systems, Company Policy and Process.
