

dorsaVi USA signs master pilot agreement with AIG affiliate

Key points:

- **Under the two-year contract, AIG PC Global Services, Inc. (“AIG”), an affiliate of American International Group, will purchase ViSafe technology to conduct assessments of their clients’ manual handling activities**
- **dorsaVi will train AIG risk consultants to use its technology, and will provide analytics and recommendations for these assessments to allow AIG to develop interventions for their clients**
- **dorsaVi’s technology will be used in the US, UK, Hong Kong and Singapore initially, and potentially other countries**

Melbourne, Australia – 22 May 2018: dorsaVi Ltd (ASX: DVL) is pleased to report its US affiliate has signed a master pilot agreement with AIG PC Global Services, Inc. (“AIG”), an affiliate of American International Group (NYSE:AIG). Under this two-year contract dorsaVi’s ViSafe technology will be used by AIG to conduct risk assessments for their clients.

dorsaVi will provide professional services to AIG with respect to its technology. AIG have been granted exclusive rights to purchase ViSafe equipment and perform their own ViSafe assessments in the insurance and broker markets for a period of six months. dorsaVi may continue delivering its standard ViSafe consulting service to this sector.

The program also allows AIG to assess the potential of a broader roll out and application of dorsaVi’s technologies and products.

“We’re looking forward to a long and rewarding partnership with AIG. It is fantastic to be working with a global insurance group of AIG’s reach and stature across a number of markets.” said dorsaVi CEO Dr Andrew Ronchi.

“We are pleased to partner with AIG and believe over time, greater use of data and analytics will become more common place and help lead to improved safety practices and reduced injuries.”

About *dorsaVi*

dorsaVi (ASX: DVL) is an ASX company focused on developing innovative motion analysis device technologies for use in elite sports, occupational health and safety and clinical applications. *dorsaVi* believes its wearable sensor technology enables – for the first time – many aspects of detailed human movement and position to be accurately captured, quantified, and assessed outside a biomechanics lab, in both real-time and real situations for up to 24 hours.

Our technology has applications across three sectors:

- **Clinical:** ViMove and ViMove2 are transforming the management of patients by providing an objective assessment, monitoring outside the clinic and immediate biofeedback. ViMove is currently used by medical and physiotherapy practices in Australia, the United Kingdom, and the United States. ViMove2 is currently used in Australia and the United Kingdom.
- **Elite Sports:** ViPerform is allowing coaches and medical teams managing elite athletes and teams to screen athletes and provide objective evidence for decisions on return to play, measure biomechanics and provide immediate biofeedback out on the field, tailor and track training programs and optimise technique and peak performance. ViPerform is being used by AFL and NRL clubs, England and Wales Cricket Board and Board of Control for Cricket in India, Barclays Premier League (EPL) clubs in the UK and US-based sports clubs from the National Basketball Association (NBA), the Major Soccer League (MLS) and the National Football League (NFL) as well as various Olympic teams and athletes internationally.
- **OHS:** We combine innovation, measurement, and quality to reduce workplace incidents, costs, meet compliance and improve brand reputation. ViSafe and myViSafe enable employers to assess the risk of injury for employees as well as test the effectiveness of proposed changes to workplace design, equipment or methods based on objective evidence. Our workplace safety solutions are used by major corporations including Sodexo, London Underground, Vinci Construction, Crown Resorts, Caterpillar (US), Monash Health, Coles, Woolworths, Toll, Toyota, Orora (formerly Amcor), Crown and BHP Billiton.
